

How to Install **LongTracker** (PC or Mac):

1. **Make sure Java is installed** on the computer: www.java.com
 - a. To verify if Java is installed go to:
www.java.com/en/download/help/version_manual.html
2. **Copy the LongTracker files into a folder** on the computer (24 files total).
Sample folder name: C:\Matlab Files\Longtracker
3. **Install MATAB version 2022b or higher, and the MATLAB toolboxes:**
 - a. **Image Processing Toolbox**
 - b. **Signal Processing Toolbox**
4. After installation is finished, **open MATLAB**, click on the **HOME** tab, and press the **Set Path** button.
 - a. Press the **Add Folder** button.
 - b. Find the folder containing the LongTracker files then press **Select Folder**.
 - c. Press the **Save** button, then the **Close** button.
5. Type **longtracker** at the MATLAB Command Window prompt and press Enter.
LongTracker should open.
